

OFFICE OVERLOAD

Gag me with more technology until I'm puking diodes. Plant a chip in my brain so every time I walk within 10 miles of a 5G tower some freak on the other side of the world can make me run to the nearest ATM and transfer \$500 into his bank account in Switzerland. Let me communicate on every known social platform so I can get hacked more often. And furthermore.....

I wanna have sex with a robot
I'm tired of the human touch
I wanna' have sex with a robot
I don't think that's asking too much
let's keep it artificial
wha' da' ya' say
cheap and superficial
it's easier that way

Give me a T shirt that says “technology will save the world”. I will be the poster boy for on line success. Let's have more internet cafes with cubicles so all the unemployed zombies can pretend they are working a good paying job for some tech company.

My analogue brain is overloading. I don't want an app to order a coffee at Starbucks. I don't want to walk in, pick up my coffee, which I have paid for with my fucking app, and walk out without having talked to anyone. I want a “good morning.... the usual?...how's your day going so far?”.....I want verbal, face to face communication....small talk is just fine.

And by the way, I was just kidding about sex with a robot.....
